The movement started with middle-class participation in the cities. Thousands of students left government-controlled schools and colleges, headmasters and teachers resigned, and lawyers gave up their legal practices. The council elections were boycotted in most provinces except Madras, where the Justice Party, the party of the non-Brahmans, felt that entering the council was one way of gaining some power - something that usually only Brahmins had access to. The effects of non-cooperation on the economic front were more dramatic. Foreign goods were boycotted, liquor shops picketed, and foreign cloth burnt in huge bonfires. The import of foreign cloth halved between 1921 and 1922, its value dropping from ₹ 102 crore to ₹ 57 crore. In many places, merchants and traders refused to trade in foreign goods or finance foreign trade. As the boycott movement spread, and people began discarding imported clothes and wearing only Indian ones, the production of Indian textile mills and handlooms went up.

28. **Read the following text carefully and answer the questions that follow:** [4]

The exact balance of power between the central and the state government varies from one federation to another. This balance depends mainly on the historical context in which the federation was formed. There are two kinds of routes through which federations have been formed. The first route involves independent States coming together on their own to form a bigger unit so that by pooling sovereignty and retaining identity they can increase their security. This type of **coming together** federations include the USA, Switzerland, and Australia. In this first category of federations, all the constituent States usually have equal power and are strong vis-a-vis the federal government. The second route is where a large country decides to divide its power between the

constituent States and the national government. India, Spain, and Belgium are examples of this kind of **holding together** federations. In this second category, the central government tends to be more powerful vis-a-vis the States. Very often different constituent units of the federation have unequal powers. Some units are granted special powers.

- i. What determines the balance of power in a federation? (1)
- ii. In "holding together" federations, which level of government tends to be more powerful in relation to the states? (1)
- iii. Provide examples of federations from each of the two routes and briefly explain the power dynamics in each type of federation. (2)

7.

- o The first clear expression of nationalism came with the French Revolution in 1789.
- o The Revolution led to the transfer of sovereignty from the monarchy to a body of French citizens. The revolution proclaimed that it was the people who would hence forth constitute the nation and shape its destiny.
- o From the very beginning, the French revolutionaries introduced various measures and practices that could create a sense of collective identity amongst the French people.
- o The ideas of *la patrie* (the fatherland) and *le citoyen* (the citizen) emphasised the notion of a united community enjoying equal rights under a constitution. A new French flag, the tricolour, was chosen to replace the former royal standard.
- o The Estates General was elected by the body of active citizens and renamed the National Assembly. New hymns were composed, oaths taken and martyrs commemorated, all in the name of the nation.
- o Regional dialects were discouraged and French, as it was spoken and written in Paris, became the common language of the nation.
- o The revolutionaries further declared that it was the mission and the destiny of the French nation to liberate the peoples of Europe from despotism, in other words to help other peoples of Europe to become nations.

OR

Napoleon became the ruler of France on 2nd December 1804. He established a monarchical political system. He was worried by the democratic forces unleashed by the revolution. But at the same time, he did not want to ignore them entirely. So he introduced some reform in the administrative system. He tried to make the whole system more rational and efficient. To achieve this goal, he took some important steps.

These were as follows:

- i. The Civil Code of 1804, also known as Napoleonic Code, abolished all the privileges based on birth, established equality before the law and gave the right to property.
- ii. The code which was introduced in the regions under French control, like Italy, Germany, Switzerland, simplified administrative divisions, abolished the feudal system and freed peasants from serfdom and manorial dues
- iii. Uniform weights and measures were adopted. A common national currency helped in the movement of goods and capital from one region to another.
- iv. Moreover, guild restrictions were removed, transport and communications systems were improved. By these new policies peasants, artisans, workers and new businessmen were benefitted and started to enjoy new-found freedom.

Thus, it can be concluded that Napoleon had destroyed democracy in France but in the administrative field he had incorporated revolutionary principles.

Explanation:

Kamal works in the unorganised sector. The unorganised sector is characterised by small and scattered units which are largely outside the control of the government. There are rules and regulations but these are not followed. Jobs here are low-paid and often not regular. There is no provision for overtime, paid leave, holidays, leave due to sickness etc. Employment is not secure. People can be asked to leave without any reason. When there is less work, such as during some seasons, some people may be asked to leave.

35. Developed countries want developing countries to liberalise their trade and investment because the MNCs belonging to the developed countries can then set-up their manufacturing centres in less-expensive developing nations lowering their manufacturing costs. This will increase their profits.

In my opinion, the developing countries should demand, in return, some manner of protection of domestic producers against competition from imports from the developed countries which are subsidised by them. Also, some additional charges should be levied on MNCs looking to set up base in developing nations.

36. Interest rate, collateral and documentation requirement, and the mode of repayment together comprise what is called the **terms of credit**. The terms of credit vary substantially from one credit arrangement to another. They may vary depending on the nature of the lender and the borrower.

- **Interest rates:** The interest rate is the rate elicited when borrowing and lending loans the interest rate is stated in the document.
- **Collateral:** It is an asset that the borrower owns, such as a house, shop, or property. It is used to borrow money. It is a guarantee to a lender that the loan will be repaid.
- **Documentation required:** Before lending money, lenders review all documents related to the borrower's employment history and income.
- **Mode of Payment:** It is the time frame for repaying the loan. Long-term loans can be repaid in 12 months, 6 months, or monthly instalments via cash, check, or other means.

37. It is true that for development, people look at a mix of goals. Income is not only an important factor leading to the country's development. The other factors like freedom, respect, peace, harmony are as important as income. We can understand this with the following example.

- i. If women are engaged in paid work, their dignity in the household and society increases. So in this case other than the income from the job, dignity is an important goal.
- ii. However, it is also the case that if there is respect for women, there would be more sharing of housework and greater acceptance of women working outside.
- iii. A safe and secure environment may allow more women to take up a variety of jobs or run a business. These are goals other than income. Hence, the development goal is not only for better income but for other important things in life like an increase in human value.

Agriculture has been the backbone of the Indian economy through its share in the Gross Domestic Product has registered a declining trend (from 1951 onwards). In 1950-51 the share of agriculture in GDP was 52% but in 2013-14 it was only 18%. However, its share in employment is not declining and in 2010-11 about 52% of the total workforce was employed by the farm sector which makes more than half of the Indian population is dependent on agriculture for sustenance. The declining share of agriculture in the GDP is a matter of serious concern because any decline and stagnation in agriculture will lead to a decline in other spheres of the economy having wider implications for society. Following points will make it more clear.

- i. If the produce in agriculture reduces, then it means that there is not much work for rural farmers. There is more unemployment.
- ii. There are many industries that process crops/foods from the agricultural sector. They will be out of business too. So, the economy goes down.
- iii. The stock exchange indices also go down. That leads also the devaluation of the currency. People in the nation go hungry due to lack of sufficient produce.
- iv. Grains and seeds need to be imported. Hence, the government and people have to spend money on import and pay extra too.
- v. That also means self-sufficiency suffers. This could topple even governments.
